PROFESSIONAL SUMMARY

Computer Science graduate (University of Jordan, 2026) with hands-on experience building full-stack web applications using React, JavaScript, PHP, and MySQL, plus a 3D game built in Unreal Engine 5 with C++. Completed enterprise networking, firewall, and security training at Cairo Amman Bank. Familiar with Agile practices. Seeking an entry-level Software Engineering or Technology Systems role.

TECHNICAL SKILLS

- **Languages:** C++, C#, JavaScript, PHP, SQL, Java
- **Web & Databases:** React, HTML5, CSS3, MySQL, RESTful Concepts, Responsive Design
- **Game & 3D:** Unreal Engine 5, Blueprints, Blender, Photoshop
- **Networking & Security:** Routing & Switching, Fortinet, Palo Alto, XDR (Extended Detection and Response), NDR (Network Detection and Response), Security Monitoring
- **Tools & Practices:** Git, GitHub, VS Code, Visual Studio, Linux, Agile, OOP

EXPERIENCE

Networking & Cybersecurity Intern | Cairo Amman Bank, Amman, Jordan | Apr 2026 – May 2026

- Trained on enterprise networking (routing and switching) and security architecture.
- Analyzed security operations using firewalls (Fortinet, Palo Alto) and monitoring tools (Trend Micro, XDR, NDR).

PROJECTS

Golden Ages — UE5 Graduation Project | Unreal Engine 5, C++, Blueprints, Blender

- Developed a 3D puzzle-adventure game on Arab scientific achievements, including an inventory system, save/load, and state management.
- Programmed puzzle mechanics in C++ and Blueprints; modeled and optimized 3D assets in Blender.

SafarTech — Tourism Web Platform | React, JavaScript, PHP, MySQL

- Built a platform connecting tourists with local experiences and hospitality partners.
- Implemented location-based features, dynamic travel packages, and a rewards system.

Balagh — Government E-Reporting Platform | React, JavaScript, PHP, MySQL

- Built a web app for reporting municipal issues across multiple sectors.
- Implemented category-routing logic that automatically sends each report to the relevant authority.

Virtual Chemistry Lab | React, JavaScript, CSS3

- Built a browser-based simulation of chemical reactions under varying temperature and pressure, with a bilingual (AR/EN) responsive UI.

Dukkan — E-Commerce Web Application (In Progress) | ASP.NET Core, C#, Entity Framework Core, JavaScript, MySQL

- Developing a full-stack e-commerce application featuring responsive UI, multi-currency / bilingual support, and secure JWT-based authentication.
- Designing relational database schemas and RESTful API endpoints for product catalog management, dynamic cart updates, and checkout workflows.

EDUCATION

- **University of Jordan**, Amman, Jordan
- Bachelor of Science in Computer Science
- Graduated 2026

AWARDS & HONORS

- **2nd Place Winner** | Hult Prize On-Campus Competition (University of Jordan)
- **3rd Place Winner** | Tourism Development & Visitor Attraction Hackathon

CERTIFICATIONS & TRAINING

- **Enterprise Networking & Cybersecurity Training** | Cairo Amman Bank (2026)
- **AWS Academy Graduate – AWS Academy Cloud Foundations** | Amazon Web Services (AWS)
- **AWS Certified AI Practitioner / Cloud Essentials** | Amazon Web Services (AWS)
- **Linux Essentials Certification** | AWS / LPI (Linux Professional Institute)

LANGUAGES

- Arabic (Native)
- English (Professional Working Proficiency, B2)
